Office Action Summary

Art Unit: 1644

Claims 1-9 are pending.

Since "increasing the production of IL-1RA" as recited in claim 9 is deemed to be an inherent result of the administration of a PGS-2 inhibitor (pp. 9 and 12); claim 9 will be examined with claims 1-8. However, the below stated election of species applies.

Claims 1-2 and 6-9 are generic to a plurality of disclosed patentably distinct species comprising various PGS-2 inhibitors, such as glucocorticoid inhibitors, various interleukins, and TGF-beta; as disclosed at page 8. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The restriction is deemed proper since various corticosteroid, various interleukins, and various other chemokines have been used to treat a variety of different autoimmune conditions. Applicant should note that reciting a mechanism by which a known drug inherently acts does not impart novelty. *Eli Lilly v. Barr Laboratories* 58 USPQ2d 1869.

The various PGS-2 inhibitors recited at page 8, as well as other such as indomethacin and NS-398 (recited in claims 3 and 5) have diverse structures and therefore require distinct searches

according to the U.S. classification system or on-line data bases. Since the search for all species is burdensome applicant is properly required to elect a specific compound as a preferred species.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Saunders, Ph.D., whose telephone number is (703) 308-3976. The examiner can normally be reached on Mon.-Thu. from 8:00 a.m. to 5:30 p.m. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan, can be reached on (703) 308-3973. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-3704.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
